

Stream No. 9 Miners River, Unakwik Inlet.

Is a large stream--mostly glacier water and connects with Miners Lake and is a red salmon lake.  
No information on this.

Stream No. 10 (1 notice) Jonah Bay, Unakwik Inlet.

Is 20 feet wide and 7 inches deep.

Has a fine gravel bottom.

The stream bed is all the way from 30 to 50 feet wide, with shallow water in those places, and is accessible for a distance of 4,000 feet, but no fish further up than 2,000 feet above mean high tide line.

There were 6 reds and a few silvers here September 4, 1925.

I gave this 6,500 fish Sept. 10, 1926,--2,700 humps.

No visit 1927. Allowed for.

Stream No. 11 (2 notices) Siwash Bay, Unakwik Inlet.

There are several branches of the main stream.

North side has one,--14 feet wide and 4 inches deep, and another 6 feet wide and 4 inches deep.

The largest comes out just south of a low timbered hill, and is 24 feet wide and 10 inches deep, and has few fish in it.

It is part glacier water.

Another one on the south side is 20 feet wide and 6 inches deep and has more fish in it.

All have fine gravel bottom, but there are lots of glaciers up the valley.

Visit Sept. 11, 1926,---5,000 fish all told.

No visit 1927. Allowed for.

Stream No. 12 (1 notice) East side Eaglek Bay.

Is 10 feet wide and 8 inches deep.

Has a good fine gravel bottom at the mouth, but the stream bed proper above high tide line is rough boulders and a little fine stuff with it.

About 5 live fish and 400 dead ones. It is at the head of a lagoon.

Visit Sept. 11, 1926---400 fish spawned here.

No visit 1927. Allowed for.
